

**"LH150-VR/SN" METAL HALIDE LIGHT SOURCE -150W**

The LH series sources are produced specifically for use with glass optical fibers (VR version) and synthetic fibers (SN version). The metal halide sources are supplied complete with the relative 150W halide bulb, whose focusing is performed at the factory by means of a special dichroic parabola specifically designed by Cobb Fiber Optics in order to obtain the maximum concentration of the luminous flux at the joint connector point.

The LH sources can be equipped with a gear-motor with wheel composed of colored dichroic filters to make the light change color.

On request, a special switch allows you to lock the rotation of the wheel and choose to keep a fixed color (white, red, green, blue, yellow, magenta).

Technical Features	Description
<b>Power</b>	150W metal halide
<b>Color Temperature</b>	4000°K or 3000°K* (on request)*
<b>Cooling</b>	Silenced fan
<b>IP Protection</b>	IP20
<b>Lamp Lifespan</b>	6.000 hours
<b>Change color</b>	Wheel with 6 colors (white, red, green, blue, yellow, magenta)
<b>Power supply</b>	220-240 VAC 50/60Hz

Code	Description	Optional Accessories
LH-150VR	150W metal halide for glass fiber optics	B C D
LH-150SN	150W metal halide for synthetic fiber optics	B C D

### OPTIONS

A) Predisposition for connection to dimmer.

Cod. SN-A

B) Gearmotor with color-changing rotating wheel (No. 6 colors: red, green, yellow, blue, magenta, white).

Code SN-B

C) Gearmotor with rotating star effect wheel (pulsating, sparkling effect).

Code SN-C

D) Predisposition for color change wheel rotation lock: It allows the rotation of the wheel to block the rotation through an ON / OFF switch

Code SN-D
